Staten Island, NY | 917-981-1006 | myuen1015@gmail.com | LinkedIn | Github

EDUCATION

The City University of New York, College of Staten Island Expected May 2026
Bachelor of Science in Computer Science
Activities: Computer Science Club, Volleyball Club

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, HTML/CSS, PHP
Tools: Git/GitHub, VS Code, Excel, BeautifulSoup, Pandas, CSV, Docker, FFmpeg, Linux, Windows, Lua
Testing: QA Test Case Design, Bug Tracking & Severity Classification, Functional & Regression Testing
Other: Responsive Design, Web Scraping, CLI Development, Moodle/LMS, Fluent in Cantonese

WORK EXPERIENCE

College of Staten Island — IT Department, College Assistant August 2024 – Present

- Provide frontline technical support to students and faculty, resolving multi-factor authentication (MFA), CIX portal access, and account recovery issues.
- Oversee daily computer lab operations, including system readiness checks, troubleshooting hardware/software issues, and maintaining lab security.
- Collaborate with IT staff to ensure a seamless user experience, supporting 50+ users weekly in academic and administrative settings.

PYE Educational Center — Full Stack Developer Intern July 2024 – August 2024

- Engineered a SaaS platform on Moodle to deliver Digital SAT practice, integrating custom PHP plugins for adaptive question delivery, time tracking, and secure session management.
- Developed a Python-based document-to-JSON pipeline, transforming SAT prep materials (DOCX/HTML) into structured datasets while preserving equations, images, and multiple-choice formatting.
- Automated parsing and image mapping, cutting manual formatting time by 80% and improving accuracy of test materials across math and English subjects.

PROJECTS

MedPortal / MedCare — QA Testing (Django REST, Vue 3, TypeScript)2025

- Designed and executed 30 structured frontend test cases for a full-stack hospital appointment web app, covering authentication, appointment booking, patient/provider dashboards, and admin functionality.
- Identified and documented 16 bugs categorized by severity (Critical, High, Medium, Low), including a multi-layered timezone bug where buildDateTime sent UTC while isPastDateTime compared local time, causing incorrect appointment times.
- Uncovered a critical localStorage defect where provider_id always defaulted to 1, causing the provider dashboard to update the wrong provider's appointments regardless of who was logged in.
- Produced a complete QA report with reproducible steps and expected results, enabling the development team to prioritize and resolve issues efficiently.

Personal Portfolio (HTML, CSS, JavaScript)

- Designed and developed a personal portfolio website showcasing projects and skills with interactive hover effects and mobile-first animations.
- Implemented responsive design and interactive UI elements; enhanced front-end skills including CSS animations and UI responsiveness.

Word Hunt Game Solver (C++)

- Built a C++ algorithm to solve the Word Hunt game, identifying all valid words on a 4×4 grid using DFS and backtracking — solves in under 1 second.
- Employed a Trie data structure to optimize word search operations, ensuring fast and efficient word detection.
- Leveraged Object-Oriented Programming principles to create modular, maintainable code that facilitates future updates and feature additions.
